Company Message

Dear Betcom Customer;

As we are leader in the field of the decoration materials in Egypt for long years and we gained our expertise through carrying out a wide range of projects and dealing with clients. We believes that the products must be competitive in the quality and the prices with time factor and from our expertise with our clients which formed our philosophy which revival is committed to providing a transparent service for clients' exceptional quality and outstanding excellence every step of the way, So you can be confident that you will receive the best value for your investment.

We believe that people are our most valuable assets, Understanding our customers' requirement and translating their vision to achieve satisfaction. Our aim is to become a window that overlooks, including consultants, contractors and engineers on the latest technologies in the world of decoration.

The company took upon itself the responsibility of developing and improving the quality of services provided to you and we also explore the views of our customers and their needs are studying to gain access to the required degree of efficiency.

Our decorative products premium quality and durability whether building a new house or remodeling. The products can match the decorative impact, versatile and permanence of architectural requirements. Products are of standard size, durable, Lightweight, weather resistant, smooth surface and ready to paint.

General Manager
Waseem Hassan

Our decorative products are produced from high quality materials (plaster powder) reinforced with fiber glass in moulds of fine 3D shapes.

All our GRP are modeled and produced in high quality non-Toxic plaster powder and glatss fiber to yield the fine quality add class and elegance touch / image to your wall and ceiling decorations.

The products can be touched up / painted with any type of paint.

Plaster is a natural mineral-based product. It is non-combustible, asbestos-free, and is free from harmful agents or petrochemical agents and Chlorofluorocarbons, Formaldehyde free.

CFCs (Chlorofluorocarbons), were actually used as a blowing agent in others type of moldings products (PU molding) productions. All foams require a blowing agent in order to be able to expand in addition, they decrease the severity or a reaction to temperature changes, they allow for a control when it comes to density and viscosity, and soften the foam.

Humanity Green

Betcom is devoted to the research, development, and improvement of its products to reach the ideal of making people most comfortable, Betcom has been continuously creating and improving the materials and various patterns, as well as practical functions of its products.

Meanwhile, the usage of Betcom products will give you the greatest performance for the least amount of resources.

We hope our products can substitute for wood and polyurethane (PU) materials to prevent the over use of those materials, minimizing the impact of destruction and contamination to our green land and fulfilling our responsibility as member of the global village.

Liability is not just a word; it is a principle Betcom to look up to. Only by treasuring our green land can we have clean surrounding, holding this belief Betcom will create a brilliant future with you.
